# Magical Aromatherapy: The Power Of Scent (Llewellyn's New Age Series)

## Synopsis

Magical Aromatherapy by Scott Cunningham combines the modern science of aromatherapy with the ancient science of magical perfumery. Together they make a powerful system that can improve your life and bring you what you want. Already, over 170,000 people have found out how useful this book can be. You can, too! In these pages you'll discover how to use aromas from fresh and dried herbs and essential oils to make changes in your life. You can use them to bring you love, peace, protection, psychic awareness, happiness, joy, and more. You'll discover that the dried seeds of celery can be used to enhance psychic awareness or bring restful sleep. The fresh flowers of gardenia can be used for peace, love, and spirituality. Honeysuckle can be used for weight loss and prosperity. This book includes full instructions on how to use these three and ninety-seven more aromatics! If you do magical rituals, you'll also be thankful for information such as the ruling planet and element for each of the herbs. Also given are aromas of the seasons, lunar cycles, days of the week, and zodiacal signs. You'll also learn how to make, store, and use essential oils. Cunningham also includes addresses of essential oil distributors; fresh and dried plant distributors; and aromatherapy organizations and publications. There's even a glossary and a great annotated bibliography, as well as a history of magical perfumery. Even if you've never done any magic in your life, you can use this book. For example, to attract love, "visualize yourself freely giving and receiving it as you smell the crushed fruits" of the caraway. You can repeat this several times a day, especially if you are worrying about your current relationship. And if you've been doing rituals for a long time, you will find this book to be invaluable. The correspondences and information will allow you to use aromatics to enhance any of your rituals. This is truly a book anyone can use.

This is the only book I know of that deals with the magical use of aromatherapy. Scott Cunningham gives a huge list on different scents. He tells you if it should be used as an oil, dried herb, seed, or fresh. He also tells you the precautions of each herb/seed/flower/oil. He also gives you an idea of how little or how much these oils will cost you. He also gives you the planetary power of each of these scents. Also in the back of this book you will find a few recipes of different oil blends to use in your aromatherapy magic. This is a great book that deals on the subject of aromatherapy for magic.

Book is a great reference of scents. It begins with the use of scent and how inhaling certain herbs and essential oils can effect our moods and outcomes in life. It has different methods and techniques to gain specific results with aromatherapy. Includes recommended aromas for days of the week, seasons, lunar cycles, elements, planets, and zodiac. It also contains a list of oil and plant distributors for your harder to find items. Also includes a pretty big reference guide of the aromas and their uses. Very handy to have around. I know I will be referring to it time and again.

This book is a must have for any magical cabinet. The book not only tells you what scents to use for your spells but also things to be aware of (ie. toxic oils, natural v. synthetic, etc.) if your are going to buy only one Aromatherapy book this should be it!!!!

This book is a must-have for anyone interested in the magick of aromatherapy. Practical, easy directions using easy to find ingredients. I've been using this book since it was first published, THE RECIPES WORK!

For the price and the size this book wins hands down. It is a very thorough little book, and would be a great addition to anybody's magickal library. It is a wonderful section that is a mini encyclopedias of different plants and herbs used for aromatherapy, which lists the parts of plant used, ruling planet, and magickal uses. I do however, like any specific topic, think you should also read and refer to other sources if you are serious about persuing something. However, this is an excellent choice for a start.

Yes, and I mean it, if you want concentrated information about the uses of essence in ritual, you are looking for this book. It has all the necessary and no unnecessary information, and I believe that this book is a stand-alone, even without the more extended books on aromatherapy by Cunningham. You will find information about herbs, dried, fresh, aromas and pure essences, and when and how they can be used, and to what end. This little marvel has it all!

I must disagree with the person who said that this is the only book on aromatherapy you will ever need, I have quite a few and most are more informative. The only information that you do not find in the standard aromatherapy book is the correspondance section, (Lunar, day, astrological, elemental, etc). I found this book to be less informative then Cunningham's "The complete Book of Incense, oils, and brews". But as a starter aromatherapy book or supplement to his other books it would be a good choice.

this book tells about different scents,how to use them for magick,and what ones are dangerous and should not be used. i highly reccomend this book
