Amazing writings! This man has discovered secrets of how humanity and civilization began. All Religions need to take a deep breath and revise their basic concepts of who we are, how we began,

and where is our future...

A wonderful group of books, amazing information. Sitchin lays it all out so beautifully. A must read for anyone who our history without the narrow minded mainstream indoctrination. Real Science, real history... I have read all of these books and find myself picking them up again for a second read.

On book 6! What a wonderful set of books that explain the mysteries of the earth and civilizations prior to today. Backed up by the Oldtestament. Does not address the New testament as there is no historical proof to present.

this was a gift for a friend of mine, but I will get the benefits of getting to borrow them as he finishes them. Very excited to read these. The gift set is super nice, all hard cover books with a storage box. The plastic overwrap was pretty crappy but the box was packaged well so no damage to anything. I've read a couple of Zecharia's books so I already knew the type of material and the genre getting into it.

I've nearly gone blind trying to read and re-read the mass market paperback versions of this series over years, so getting them in bright new 6x9 hardbacks is wonderful. The set looks great. The books are nicely formatted. And I love the cardboard sleeve. It's a great bargain for any collector.

This is a great resource from which to learn about peoples, cultures, religions, and philosophies that are only given scant acknowledgement in the Bible. Sitchin is now deceased, but we can be thankful that he was here to write this remarkable series. Don't miss it!

This is a very well written series. Makes a person think about our exsistance and how certain structures on our planet may have been erected or shouls I say more like by whom they were erected by.

truly understands why we are here.....1st man to decipher sumerian texts.....if you dont get it, you dont get it
