Birding Washington (Birding Series)

Synopsis

As the first stop in the continental U.S. for birds migrating along the Pacific Flyway, Washington offers a wide range of birding opportunities and species, from the typical fall migrations of ducks and geese to the convergence of millions of shore birds in Grays Harbor each spring.

Book Information

Series: Birding Series

Paperback: 400 pages

Publisher: Falcon Guides; 1st edition (October 1, 2004)

Language: English

ISBN-10: 076272577X

ISBN-13: 978-0762725779

Product Dimensions: 6 x 0.7 x 9 inches

Shipping Weight: 1.4 pounds (View shipping rates and policies)

Average Customer Review: 3.0 out of 5 stars [See all reviews](#) (4 customer reviews)

Best Sellers Rank: #2,211,393 in Books (See Top 100 in Books) #92 in [Books > Science & Math > Biological Sciences > Animals > Birds & Birdwatching > Excursion Guides](#) #1632 in [Books > Science & Math > Biological Sciences > Animals > Birds & Birdwatching > Field Guides](#) #2315 in [Books > Science & Math > Nature & Ecology > Field Guides](#)

Customer Reviews

Since I'm planning a future birding trip to Washington state, I purchased this book as a reference for planning and executing my trip. I own several "Falcon Guides", and have found them all to be very informative and useful, until now. The information within this book is excellent, but finding what you want is VERY difficult. I can't believe anyone would publish a book/guide such as this and not include any place-names in the back-of-the-book index!!! The index is comprised entirely of bird names. Every other Falcon Guide I own has place-names in the index. Where was the editor on this?

I picked this book up to help plan some birding stops on a business trip to Washington State, as I've never spent any time birding in Washington. While it does have a fair amount of good information about potential birding locations, I found the book difficult to use. First and foremost, for those unfamiliar with Washington's geography, the location maps in the book provide little in the way of reference; outside of the Seattle area, the maps don't often offer much to go by, rarely placing cities

or even major highways on the maps in any meaningful way. For example, I planned to bird primarily in the Tri-cities (Richland, Kennewick, and Pasco) area in central-to-southeastern Washington; though I was able to find some sites I knew to be in that area (like Hanford Reach), it was tough to piece together a logical loop or series of daytrips using the maps in the book, and I never saw any of those communities on the maps. This lacking is in contrast to the other Falcon guides I've used, such as their *Birding Northern California*, which in general make it easy to zero-in on a particular area and explore many nearby sites easily. I suggest birders interested in Washington instead consider *A Birder's Guide to Washington*; although rarely carries the ABA guides (and when they do, the books tend to be much pricier than if obtained straight from the American Birding Association or a local birder's or nature store), the ABA guide for Washington provides more in-depth information as well as a much easier-to-navigate (no pun intended) organization of the birding sites.

This book is a delightfully written guide to Washington's best birding sites. It's not as comprehensive as Hal Opperman's book on Washington Birding; but who says there can't be two great books on this subject. Natalie McNair-Huff's writing is a special treat, and she captures more than the "where to" and "how to" of Washington birding.

this book tells you where to find birds but does not really help identify them. It is great for planning a birding trip but you need another book for identifying the birds you see quickly.
