# Time's Arrow: The Origins Of Thermodynamic Behavior (Dover Books On Physics)

## Synopsis

Written by a well-known professor of physiology at McGill University, this text presents an informative exploration of the basis of the Second Law of Thermodynamics, detailing the fundamental dynamic properties behind the construction of statistical mechanics. Topics include maximal entropy principles; invertible and noninvertible systems; ergodicity and unique equilibria; asymptotic periodicity and entropy evolution; and open discrete and continuous time systems. The author demonstrates that the black body radiation law can be deduced from maximal entropy principles; discusses sufficient conditions for the existence of at least one state of thermodynamic equilibrium; describes the behavior of entropy in asymptotically periodic systems and the necessary and sufficient condition for the evolution of entropy to a global maximum; and presents the three main types of ergodic theorems and theory proofs. He also explores the potential of incomplete knowledge of dynamical variables, measurement imprecision, and the effects of noise in entropy increases. Geared toward physicists and applied mathematicians with an interest in the foundations of statistical mechanics, this text is suitable for advanced undergraduate and graduate courses.

## Book Information

Series: Dover Books on Physics

Paperback: 190 pages

Publisher: Dover Publications; Dover Ed edition (November 17, 2003)

Language: English

ISBN-10: 0486432432

ISBN-13: 978-0486432434

Product Dimensions: 5.4 x 0.4 x 8.4 inches

Shipping Weight: 4 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars [See all reviews](#) (1 customer review)

Best Sellers Rank: #527,393 in Books (See Top 100 in Books) #11 in [Books > Science & Math > Physics > Entropy](#) #227 in [Books > Science & Math > Physics > Dynamics > Thermodynamics](#)

## Customer Reviews

Very interesting book about Markov operators and statistical dynamics. Not \*that\* hard to read, but definitively not for all readers.

Time's Arrow: The Origins of Thermodynamic Behavior (Dover Books on Physics) Architecture and

Systems Ecology: Thermodynamic Principles of Environmental Building Design, in three parts  
Jet Propulsion: A Simple Guide to the Aerodynamics and Thermodynamic Design and Performance of Jet Engines  
Physics for Scientists and Engineers with Modern Physics: Volume II (3rd Edition) (Physics for Scientists & Engineers)  
Head First Physics: A learner's companion to mechanics and practical physics (AP Physics B - Advanced Placement)  
Thermodynamics and the Kinetic Theory of Gases: Volume 3 of Pauli Lectures on Physics (Dover Books on Physics)  
Atomic Physics and Human Knowledge (Dover Books on Physics)  
The American Boy's Handy Book: Build a Fort, Sail a Boat, Shoot an Arrow, Throw a Boomerang, Catch Spiders, Fish in the Ice, Camp without a Tent and 150 Other Activities  
Moral Hazard in Health Insurance (Kenneth J. Arrow Lecture Series)  
Arrow to the Sun  
The Apple and the Arrow  
The Archer and the Arrow  
Arrow to the Sun: A Pueblo Indian Tale  
For the Love of Physics: From the End of the Rainbow to the Edge Of Time - A Journey Through the Wonders of Physics  
Spawn: Origins Volume 1 (Spawn Origins Collection)  
The New Testament and the People of God/ Christian Origins and the Question of God, Vol.1 (Christian Origins and the Question of God (Paperback))  
The Philosophy of Space and Time (Dover Books on Physics)  
The Time Garden Note Cards: Color-In Note Cards from the Creator of The Time Garden and The Time Chamber (Time Adult Coloring Books)  
Understanding Human Behavior: A Guide for Health Care Providers (Communication and Human Behavior for Health Science)  
Crucial Accountability: Tools for Resolving Violated Expectations, Broken Commitments, and Bad Behavior, Second Edition: Tools for Resolving Violated Expectations, ... and Bad Behavior, Second Edition
