I bought this for my daughter. She is really into animals and hopes to be a Vet when she gets older. She loves the pictures in this book and the fact that they give free posters. If you are into sharks or animals I would recommend this book.

This book is a perfect addition to my shark collection. I love having something that allows me a simple way to show kids why sharks rule. The pictures inside are great and bold plus the book is not so wordy that it makes it easy to share with a small child. This book will be used a lot in my house thanks to our shark week traditions!

I ordered this for my 4 year old daughter who loves sharks, and we've had an excellent time going through the book and reading all of the information and looking at the beautiful information. I'm really happy with this product.

I have twin 8 year old daughters who just love this book. It has so much information in it and keeps their attention. It also has great posters you can cut out and put on your wall. For any child (or even adult) shark enthusiast, this book is for you!

My son is 5 years old and he absolutely loves this book! And the shark posters included. He is excited to decorate his walls with his new favorite animal. Nonfiction is the way to go with early learners

This book was loaded with information and the imagery was fantastic. My grandson is really enjoying it. Also, there were 5 (FIVE) posters inside, fit for framing! Thank you Discovery Channel!

My 7 year old nephews loved this for Christmas. It is detailed enough for them and they look at it over and over again. They like facts and figures about sharks and read out loud with this so we are all learning. I would highly recommend this for education and fun!

I ordered this as a Christmas gift for my eight year old cousin. He's obsessed with sharks and loves to tell me facts about them. I thought this book was a little "wordy" for his age, but I think he still enjoyed the colorful pictures and posters included. I would recommend this product.
