I work with seriously emotionally disturbed children, teenagers and families. I read this book because some of the teens I was working with were very taken by it. I found it to be a very simplified caricature of a suicidal teen. Having worked with actual people who are actually suicidal, I can tell

you, the '13 Reasons' that Hannah killed herself wouldn't have even made the list for most people contemplating suicide. It may sound harsh, but, barring any serious underlying mental illness (to which there was no reference), Hannah would never have killed herself for the reasons stated. This is such a popular book, and unfortunately it does a real disservice to teens in their understanding of suicide and what to do about it. The idea that a counselor, upon hearing that a student was considering suicide, let her walk away without contacting her parents is unthinkable. Aside from this being unethical (which, granted some therapist's are), no therapist would ever think to act in such away due to the legal ramifications. Even the most incompetent would have immediately gotten Hannah help. Aside from the above issues, comes the underlying message. What was it? Be nice to people or they might kill themselves? Be on high alert for people who seem sad? Mostly what I got out of it was that you are responsible for others actions. It seems very one sided. In truth, we all do cruel things, we can all think back on times when, for one reason or another we behaved badly. To say that human error deserves such retribution is alarming. Not only that, this idea of post-death vindictiveness is a very attractive idea to teenagers who feel misunderstood and unheard.

...to know that I'm not the only one who thought this book was exasperating beyond measure. A friend advised me to read it and she raved about it so I was expecting it to be beyond awesome. I finished it in one evening (it's definitely a page turner) but it just left me feeling fed up with Hannah. I've had my own share of suicidal thoughts, etc so it's not as if I couldn't relate to the character. But I just found myself questioning the whole premise of the book. I understand that most readers found it thought provoking in regards to how our actions can so deeply affect those around us and it does cause you to examine your own actions and behavior towards others. That said, I think creating a very elaborate map and set of tapes for 13 people and essentially blackmailing them into listening to the tapes just reeks of a vindictive, selfish individual. Perhaps her tapes didn't affect all her listeners as deeply as they affect the narrator but, if it were me, I would be devastated and scarred for life if I received a suicide message along those lines. It's one thing to go back to people who have harmed you and say "Hey, you messed up and you really hurt me. Just wanted you to know" and to move on with your life (with the help of a good therapist in Hannah's situation) but it's another thing to say "Hey, here are a set of tapes that describe all the detailed slights and harms that have been done to me and you can feel horrifically guilty for the rest of your life because I'm DEAD now! So there!" Yes, some of those people did some horrible things. I'm not excusing their actions. But I also think most of those people honestly didn't know Hannah well. I have no clue what is going on in the private lives of most of the people I see every day.

I am one of the rare minority who did not enjoy this book. In fact, I was completely annoyed with it. I struggled through it and kept rolling my eyes. It took a lot to make myself finish it. I hoped it would get much better, since there is so much positive hype surrounding this book, but unfortunately it did not. I am also going to preface my negative comments by saying that I am not at all mean-spirited, heartless, or think lightly of suicide. I also have been at the receiving end of some terrible things in high school so I do know what that feels like, and so I am not approaching this as simply someone who didn't experience bad things in high school. Suicide is an extremely serious issue, and I think it is extremely important to be explored in books, especially considering the epidemic of teen suicides we have been facing lately. However, I felt like this book did not give it the respect and seriousness it deserves. I loved the concept of this story, and I think a story like this has the potential to be amazing and powerful. Perhaps if it was tackled by a different author or had different characters, maybe I would have thought it was. I did enjoy the dual narration format of the book. This was a very interesting and engaging format to choose. However, it did get a little bit confusing for me with the back and forth, not only because it switched from character to character as well as from present to flashback. This might have been because I was not 100% engaged with the book since I did not enjoy it, and so I bet I got a bit sloppy in my reading habits. I also applaud the creativity of the book, because it is such an usual and unique premise. The writing also is engaging, flows well, and is never boring. My main problem was the characters.
