Eating Animals

Synopsis

Like many young Americans, Jonathan Safran Foer spent much of his teenage and college years oscillating between enthusiastic carnivore and occasional vegetarian. As he became a husband, and then a father, the moral dimensions of eating became increasingly important to him. Faced with the prospect of being unable to explain why we eat some animals and not others, Foer set out to explore the origins of many eating traditions and the fictions involved with creating them. Traveling to the darkest corners of our dining habits, Foer raises the unspoken question behind every fish we eat, every chicken we fry, and every burger we grill. Part memoir and part investigative report, *Eating Animals* is a book that, in the words of the Los Angeles Times, places Jonathan Safran Foer "at the table with our greatest philosophers."

Customer Reviews

This book was a catalyst where I wasn't looking for one. After the first 35 pages a light bulb started lighting up...and I feared my life was about to change. I've never written a book review, but after reading what Jonathon learned in his 3 + years of researching factory farming, I had to tell others to read it. He provides serious, horrific and real information. I never knew about factory farming until I read his book and googled 'factory farming' on the web. It was all over from there. I started watching those videos on what we do to animals-the ones we don't want to see-and I could not stomach another bite of an animal again. I loved meat, ate it easily 3xday for all of my life, grew up near those green pastures in northern California where cows graze all day. Wow. Was I disconnected and fooled...What I felt, was that he did not preach about not eating animals. He presented

information that I could personally relate to and grasp. For me, Jonathon felt like a messenger...where many have failed to bring light to what humans are systematically doing to animals every moment of every day. He provided very important information about 99% of the animals I used to buy and eat for my family and friends. I had no idea that the US alone consumes 10 billion animals PER YEAR. I finally woke up. One chicken has 2 wings(that they never use)--how many chicken wings come in a basket at a restaurant-6? 12? 24? I used to throw meat away after getting full. I was throwing away a life-a wasted one who suffered in life and in death. What frightened me more about this book is why is an author bringing this info to me? Where are the ongoing news specials on this?Jonathon's personal tone, statistical/historical data, research team, true accounts from the field, letters, etc.

It is very hard to write a review of this book without expressing one's own view of the ethics of meat eating, as most of the reviews - and many of the comments to some of these reviews - demonstrate. In fact, it is impossible to really separate the two when discussing a book that is both so personal in its narrative, and relentlessly focused on universal eating habits. My review is no different.Taking a stab at the book itself: I am not familiar with Foer's fictional works, but his background is evident as he lends the whole subject a compelling narrative and style that really make "Eating Animals" quite a page-turner (I read it in a day and a half). To those familiar with this debate, the statistics are not really new, nor are the horror stories of factory farming. What is new is the personalization of his approach (I too am a father and could relate to the decisions he faces), and, most effectively, his unflinching, relentless, repetitious focus on the reality of consuming 99% of the available meat today: The environmental damage, the suffering, the waste, the lies and corruption, the exploitation, the veil of secrecy amongst the industrial farming concerns. It is Foer's relentless focus of these central issues and his unwillingness to avoid the obvious question (How can it be ethical to consume meat under these conditions?) that I believe distinguish this book and make it most effective.So what does this mean to this reviewer in terms of his personal habits? Well, I am a long-time consumer of meat. I love everything about it in terms of taste, texture, variety, preparation, culture, etc. I am a serious hobbyist-cook, and meat has played a central role in what I prepare...
