Customer Reviews

If you're getting ready for this test, you might feel like if you organize the material, you'll be able to study more efficiently. If you use these flash cards, you won't have to do any of the prep work before you study. All you have to do is use the cards and you'll be set. The cards have all of the information on them that you need and you can have the details you need right in front of you. The cards are easy to carry around with you anywhere so you don't have to take heavy books and notes around when you want to study. You can also easily quiz yourself any time you want to see how you're doing.

As a student of Phlebotomy, this was a totally new area of study for me. The medical world is filled with a whole new language with words that were so unfamiliar to me. You have to do a lot of reading, studying and memorization. The Flash Card study system has always worked for me and that is why I purchased the Flash Card System set. The information provided is very helpful. To make it work, you do have to be faithful to it. You do have to read and re-read throughout. But after doing so, it really helped me in learning this new field. It is helpful if you are able to have someone do the cards with you, but you are able to succeed on your own if that is your only option.

Memorization is the key and by utilizing the Flash Card System regularly, you will achieve your objective. If you want to pass your license test, do yourself a favor and use this Flash Card System. All the information you will need and more is included.

The flashcard study system for the Phlebotomy exam is a great way to get the most study time in for the exam. Other flashcard systems just give you a one sentence answer that doesn't have any real substance. But these provide detailed responses so you can be sure that you are answering

correctly and not mixing up definitions or related subjects. They are written clearly and you can pretty much take them anywhere with you. That increases the amount of time you can actually study for the test and the more you study the more confident you'll feel about taking it.

Flashcards, an age old memory trick tool. When you use flashcards, you build on the art of repetition. When you see or hear things repetitively, they will slowly sink in. That's what you can do with this set of flashcards. Review the cards individually and allow the information to slowly sink in. In this set of flashcards, you will be reviewing the different concepts of anatomy/physiology, medical terminology, quality assurance and legal issues, infection control and safety issues, equipment, additives, and orders, collection procedures, non-blood collection, specimen processing, and a miscellaneous section. These flashcards also have some practice test questions presented in flashcard form. Some physical features of the flashcards are full diagrams of the body's anatomy, organs of the body and tools that are used in phlebotomy procedures. All of the diagrams and models are in color, so that is a plus. There are also boldfaced, large print font to help to separate your subject headings. There are quite a few flashcards in this system but you can easily maneuver through them if you follow the subject headings and look for areas that you may have more weaknesses in. There is a lot of information on each card for you to review but it doesn't overwhelm the cards and there is still room for you to make additional notes. There is a saying, "the more you know the further you go." There is much to "know" in this field and now you will with your trusty set of phlebotomy flashcards.

I purchased this study system to keep myself updated on all material as I have not applied for a job at this time but am a certified and licensed Phlebotomy technician. I totally recommend this system to anyone who is in need of this system.

great thank you

I ordered the Phlebotomy flash cards, received these today - earlier than expected, along with the Phlebotomy exam study guide. First inspection of the flash cards is very pleasing. I randomly selected card sheets (like the way they are delivered (8.5 x 11" card stock) and am pleased with the detailed, "lay language" front/back layout and will begin preparing for my finals and national exam. I was especially pleased that the price was at least 50% less than purchasing through a book store (national retail and/or local college bookstore). I chose the flash cards for the obvious reason,

portability, quick reference, reinforcement of what I know and what I need to learn. I've shared the availability of flash cards with others and suggested they purchase as I did since they are very "budget friendly"... This time we get both quality and quantity for the best investment.

I liked a short version of everything I need to review for exam and it is easy to carry with you everywhere, so whenever get a chance you can review them. The answers are in so detail which gives us more understanding of certain terms . I love it and I highly recommend it to others!!!
