Customer Reviews

This book is for you if you are interested in dowsing especially for health issues as well as to find energy patterns of human beings and earth. You will find a good base of information on how to start to dowse with a pendulum, and some sections will explain how to work with dowsing rods, especially helpful in case of searching for energy lines. Included in the book are 3 or 4 charts, and also an explanation on how to do blind dowsing (which can be really helpful in health related topics). The book covers a wide range of information about dowsing, but what makes his entire value is all the information contained beside. Information about the state of mind of the individual, the diet, vitamins and minerals, allergies, aromatherapy, flower essences, the life path, channeling healing energy, the subtle body and the chakras, the role of the spine hands and feet, absent healing, earth energy and the spirit of place, and the power centers are just to name some of the few interesting topics covered in the book. The author of the book, Patrick MacManaway, is a professional dowser with an international practice and reputation. He is a Vice-President of the Society of British Dowsers.

This is a beautiful production, easy to read and with lots of superb photo illustrations. The content is

very accurate, with just enough detail to establish the author's credibility and knowledge of the subject. We will treasure this book for years to come. Great service also - book arrived to the bottom of the world within a few days and in superb condition.

I have shelves of books on dowsing, metaphysics and healing. I guess, as a professional in the field, that makes sense. But this book by Patrick MacManaway is one of the ones I would keep if I had to throw all but 10 books away. The price is amazing for the content. It's beautifully written and filled with gorgeous photos. It covers all areas of the use of dowsing, a natural intuitive skill that we all have, which can be trained to help you in your healing process, in sensing energies and in making excellent choices your rational mind can't help with. This is without a doubt one of the best books on dowsing ever written. I wish I had written it myself. I can give it no higher praise, since I have written several books on dowsing. :)

This book has a part where you are taught to auto desensitize yourself against allergies. It saved me from going back to the doctor for a Kenacort (cortisone) injection to allow me to support the pollen and other flying grains who made my life miserable from May till August every year. You need to know how to use a pendulum or parallel antennas (which I prefer)

Nice information. Format not a fan but good info anyway.
