Science Of Survival

Synopsis

The most useful book you will ever own. Built around the Hubbard Chart of Human Evaluation, Science of Survival provides the first accurate prediction of human behavior. Included on the chart are all the manifestations of an individual's survival potential graduated from highest to lowest, making this the complete book on the Tone Scale. Knowing only one or two characteristics of a person and using this chart, you can plot his or her position on the Tone Scale and thereby know the rest, obtaining an accurate index of his or her entire personality, conduct, and character. Before this book the world was convinced that cases could not improve but only deteriorate. Science of Survival presents the idea of different states of case and the brand-new idea that one can progress upward on the Tone Scale. And therein lies the basis of today's Grade Chart. Dianetics revealed the previously unknown Reactive Mind that enslaves Man and the auditing procedures to get rid of it. But that was only Plan A, laying the groundwork for further research into life force. Here, then, is theta (life force) and MEST (the physical universe of Matter, Energy, Space, and Time) and their interaction, which is life itself. Therein also lie the anatomy of the Tone Scale and both the reason for an individual's downward descent and the means to ascend upward. This book is written around the now legendary Chart of Human Evaluation, providing a complete description of the reactions, traits, and behavior patterns of an individual at any given emotion. By knowing just one or two characteristics of a person, you can know the rest - his or her entire personality, conduct, and character. Then, with entirely new types of processing, one can unleash the full inherent theta potential of a being to move up to the highest levels of freedom. Here, then, are the fundamental breakthroughs that are the basis of the Grade Chart itself. Among the subjects contained herein are:

The Tone Scale
The basic laws of theta - affinity, reality, and communication
The Dynamics
The pattern, appearance, conduct, and behavior of individuals and groups as regards emotion, speech, handling of communication, reality, sexual behavior and children, the environment, worth to society, ethics, truth, courage, responsibility, persistence, and more
The basic principles of processing
The mechanics of aberration
New types of processing, including straight memory and lock scanning - processing that frees an individual's theta that is trapped in the reactive mind
How to diagnose and audit any case

Science of Survival is the essential handbook for every auditor and the means to predict human behavior in life itself. And that's why it's the most useful book you will ever own.

Book Information

Audible Audio Edition

Listening Length: 16 hours and 21 minutes

Program Type: Audiobook

Version: Unabridged

Publisher: Bridge Publications, Inc.

Audible.com Release Date: July 1, 2016

Language: English

ASIN: B01A7LE4L2

Best Sellers Rank: #49 in Books > Religion & Spirituality > Other Religions, Practices & Sacred Texts > Scientology #319 in Books > Self-Help > Anxieties & Phobias #436 in Books > Health, Fitness & Dieting > Mental Health > Depression

Customer Reviews

I actually read this book for the first time many years ago. In fact - it was when my daughter was very young - so say 22 years ago. I liked it - and remember getting some good information from it; but before reading it again recently I had no idea just how much I got out of it! I bring up my daughter because I'm very proud of her --- she never went through things like the "Terrible Twos" - and those horrible moments I've heard and seen so much of --- the "generation gap" where it seems like parents and kids speak different languages and tend to simply fight a lot. Then there are the infamous "rebellion years" that "all kids go through". My daughter never had any of those periods that drove some of my friends crazy - and worse, having their kids end up on drugs - or worse. I just put it off to - who knows..... she was special? I did something right maybe? Well - what I realized when I reread the book was that as she was growing up I used a LOT of the information I got from Science of Survival. Believe me, I didn't get the whole book when I first read it. But, one of the key factors I got was that you never, never, never try to get through to someone or have a sane conversation with anyone who's "dramatizing" and as you'll read in the book - low on the Tone Scale. If a person is upset -- (simple rule of thumb) you won't get anywhere! So, I actually talked to my daughter only when she was herself - not running around, screaming, throwing tantrums, etc. It's obvious you're not talking to her --- she's too wrapped up in some upset. Those things did happen of course. But once I started using this data, it was very rare - and then there were none. She knew from our conversations when she was herself that nothing good comes of trying to have a conversation when either one of us is upset or mad or crying or whatever. So, if that happened I'd remind her of that and let her know I was there for her when she came out of it. It was miraculous! Also - a very simple but very powerful thing I also learned from this book is that you never never never validate those times when a child (or adult for that matter!!) is upset. Why?

because then becoming upset means you'll get validation - or candy - or an OK to watch TV - or a new bike --- whatever! My daughter knew that she wouldn't get anything if she threw a tantrum or even "demanded" it in some misemotional way. But, man she was well rewarded when she would sit down with me and just talk about whatever it was she wanted. Was our relationship all a bed of roses??? No - but I'm telling you, I couldn't ask or hope for a better relationship with my daughter. So - long story; but when you find some bit of information that's that simple, and that powerful - you have to tell others. Do I recommend the book? Absolutely! But one thing -- there's a LOT of information in the book. I tend to just grab a few points of things that make sense to me and then use them. Boy did I get the right points - and somehow used them correctly.

This book came out about a year after Dianetics, and while that was basically a small text that was padded out to be a huge manual, this book is not nearly as repetitive. To me this is L. Ron's best self-help/non-fiction work because it is pretty much all you need to understand the basics of his whole world view. Also, written at a time when he was exceptionally lucid and sane, it actually makes sense! The tone scale is something that Hubbard developed which I think is a useful and informative way of understanding human behavior - it's not the only tool I use but to ignore the information in this book because of its associations would be a shame. (I'd read it with a dictionary though, merely because L. Ron tends to use a ton of jazz-cat slang that was old fashioned even by the time he wrote this in the 50s...)

It is not how much can I say about Science of Survival, it is, do I have enough time to write a review. The success is ongoing. Its success can be seen in every one who has read this book; how are their interaction as theta with MEST, the command over their environment and how do they handle another individual. The Hubbard Chart of Human Evaluation provided a complete description of the behavior patterns of an individual at any given emotion. By knowing a few characteristics of a person, I have learned to know their entire personality, behavioral pattern and character. This book has taught me the dynamics of human behavior I may have never learned in my entire life. It clearly teaches the prediction of human behavior that is beneficial for survival for my self and others. The Tone Scale in The Hubbard Chart of Human Evaluation is a great tool not only for auditors but for individuals in the position of power of hiring personnel, in relationships, in schools dealing with scholars from kindergarten to college, a tool that helps me or any single person for that matter choose a lover by knowing their tone level and many, many more fields of life. It has helped me in dealing with my family and friends in my personal life by understanding their Tone Level and

lowering or increasing mine. Nothing in my previous scholastic studies compares to knowing the human behavior as in The Tone Scale of the Chart of Human Evaluation. A world of thanks to LRH is not even sufficient. This is just Book One. Book Two covers Dianetic Processing and again how much time do I have to write what I have learned about Dianetic Processing. Before my course on Science of Survival I had completed Dianetics and now I feel I am complete. Put together, Dianetics and Science of Survival now makes sense. IT MAKES SENSE TO ME. What can I say about Dianetic Processing? After learning new types of processing such as Straight Memory and Lock Scanning in this book, I ask myself, where is the end of auditing in Dianetics? There is an end I think if one is Clear. However, that would not be an absolute end of processing. As per LRH, there are no absolutes in Dianetic Processing, i.e., infinity-valued logic, I feel there is no absolute end to the success for survival for any human being, just success and greater success, all to conquer, nothing to lose. What more do we want? Do we want to become a millionaire but live a life with full of enturbulated theta and not know Dianetics? That is not success, but accessorized success only in the eyes of another enturbulated theta. After the completion of Science of Survival course, I have had to kick myself in my head to jump start my goals. I have not worked as hard as I should have on goals when I completed Dianetics. My goal is to advocate the "miracles of LRH technology" as I personally can witness these miracles and to free as many thetas as possible for total spiritual freedom. I am hoping to post a blog on the internet and write a review on this book on Amazon.com and Google. What can I say about my completion on the course Science of Survival? This page only summarized my 15 percent of my success. The other 85 percent can only be described by showing my increased success in dealing with people at work, with my teenage daughter, my boyfriend who is also a scientologist, my success in dealing with his ailing parents and his family and most of all my own family overseas. Knowing Science of Survival and Dianetic Processing is not humbling. It is a gift that keeps on giving.
