Math Fundamentals 1

Boost math confidence & test scores!

What Are Math Fundamentals? Mathematics (abbreviated, math) is a form of science that deals with numbers—number theory, operations and measurement; all are part of mathematics. Fundamentals are essentials or basics—something that a thing or system needs to make it what it is.

SYMBOL	PLACE VALUE	ROMAN NUMERALS
≈ approximately equal	billions hundred millions tens millions one millions hundred thousands tens thousands thousands hundreds tens ones decimal tenths hundredths thousandths ten thousandths millionths	I 1 II 2 III 3 IV 4 V 5 VI 6 VII 7 VIII 8 IX 9 X 10 XI 11 XII 12 L 50 C 100 D 500 M 1,000

+	addition: sum
-	subtraction: difference
×	multiplication: product
÷	division: quotient

Order of Operations

- G**rouping symbols – solve inside grouping symbols first; grouping symbols include () [] { } /
- E**xponents – always set superscript (i.e., above integer); Ex: 10^2 , 10^{-1}
- M**ultiplication & **D**ivision – in the order of appearance (i.e., first come, first served)
- A**ddition & **S**ubtraction – in the order of appearance (i.e., first come, first served)

Decimal Operations				Integer Operations		
Line Up Decimals?	Process	Examples	Signs	Process	Examples	
+	yes Line up decimals Add normally Drop decimal straight down in sum	$21.01 + 328$ change to: 21.01 $+ 328$ 349.01	+	Answer keeps same sign: pos + pos = pos; neg + neg = neg	$-3 + -8 = -11$	
-	yes Line up decimals Subtract normally Drop decimal straight down in difference	$9.887 - 3.672$ change to: 9.887 $- 3.672$ 6.215	-	Subtract the number, keep sign of number with greatest absolute value	$8 + 2 = -10$ has greatest absolute value, so answer is negative	
×	no Multiply normally Count places to right of all decimals in problem Move decimal to left same number of places in solution	31.2×37 change to: 31.2 $\times 37$ 1154.4	+	"Add the Opposite" – change to addition; use opposite of 2nd integer; follow addition process	$-3 + 2 = -1$ change to: $-3 + 2 = -1$	
÷	no If no decimal in dividend, divide normally Bring up decimal from dividend into quotient If decimal in dividend, divide normally Bring up decimal from dividend into quotient If decimal in divisor, divide normally Bring up decimal from dividend into quotient If decimal in dividend, divide normally Bring up decimal from dividend into quotient	$30.5 \div 5$ change to: 30.5 $\div 5$ 6.1	-	Positive product: pos × pos = pos; neg × neg = pos	$4 \times 3 = 12$	
+	no If decimal in dividend, divide normally Bring up decimal from dividend into quotient If decimal in divisor, divide normally Bring up decimal from dividend into quotient	$75.2 \div 6.22$ change to: $6.22 \overline{) 75.2}$ change to: 12.08 $62 \overline{) 752.00}$	×	Negative product: pos × neg = neg; neg × pos = neg	$4 \times 3 = -12$	
+	no If decimal in dividend, divide normally Bring up decimal from dividend into quotient If decimal in divisor, divide normally Bring up decimal from dividend into quotient	$6.22 \overline{) 75.2}$ change to: 12.08 $62 \overline{) 752.00}$	÷	Positive quotient: pos ÷ pos = pos; neg ÷ neg = pos	$-4 \div -4 = 1$	
+	no If decimal in dividend, divide normally Bring up decimal from dividend into quotient If decimal in divisor, divide normally Bring up decimal from dividend into quotient	$6.22 \overline{) 75.2}$ change to: 12.08 $62 \overline{) 752.00}$	-	Negative quotient: pos ÷ neg = neg; neg ÷ pos = neg	$4 \div -4 = -1$

Customer Reviews

I am extremely pleased with this product. I love all of the bar charts quick study guides. They are great for all ages to have on hand for those sneaky formulas we constantly need reminders with. I am a home educator and work with children in various ages and I recommend getting this entire series of Fundamentals from the very beginning. You never know as a parent or teacher when you will be asked a question you just can't remember, or to have on hand for quick reference for students to have at their fingertips. The quality is great and holds up well to long term use. I keep these in a binder with our math study tools so anyone can access them and not worry about forgetting steps.

The quick study reference guides for math fundamentals has been a blessing in disguise and has helped in more ways than one. It has allowed me to help tutor my high school students with their

order of operations as well as been a handy guide I could slip into a clip board over my desk for whenever I've done order of operations or worked simple algebraic equations. The print is large and easy to read and the clear laminated cover is so wonderful, you can spill your coffee on it and it won't ruin it! If your taking any math classes, I'd recommend having one of these around. They are helpful in more ways than one.

Christmas hit, even for the old folks. Great reference chart. I got one for me and then purchased more for other family members. Quicker than google. Lots of great info and pretty handy overall. Love that it's laminated. I got the Weights and Measures Guide, too. We had a great "quiz fest" on Christmas Day!

I have a 14yr old that I home school and he is having trouble with Math. These charts are very detailed and self explanatory and I would encourage anyone struggling in Math to try these out. They really do help. The cost is very low and they deliver very very quickly!

It's not just 1 page front and back. It's actually one big sheet folded in half to make 4 pages. Reminds you in a more clear way how to do all the basic arithmetic, how to factor, reduce etc. Really helpful and so much clearer than it was when I was first trying to learn it as a kid.

This is a two sided sheet. great for students. goes along with 2 & 3 math sheets. convenient for placing in notebooks or binders. i like the lamination

Of all the math references I have purchased this gets usedt he most. It really illustrates how ruty my skills have become and how mucg I really needed a tool like this.

So glad I ordered this, just started college and it was a great refresher for me. I use it all the time and will be able to pass it along to my niece as well.
