## Customer Reviews

I'm a single mom of a ten year old who hirms and haws when it's time to come inside and be a part of our family after playing with peers. I bring this book out over dinner sometimes to inspire conversation with my world-weary son. Even though it feels like it's set up for couples, it's a lovely tool to spark reflective discussion about shared experiences, find common ground, and admire each others creativity and artistic ability.

Bought the book for my cousin who is a newlywed. Flipped through the book a little before I wrapped it up and was very impressed with the prompts provided. Some prompts can be completed by oneself like a personal journal, however doing an entry with a significant other, friend, or even a random stranger (maybe as an icebreaker?) makes this book much more enjoyable and memorable when reminiscing in previous entries. Definitely recommend to anyone who likes journaling and/or

just making and recording memories with others!

Lisa's second book in a new and exciting interactive and above all fun genre, physically larger in size than the previous book this is aimed at couples of all ages and feels good to touch and is certainly a book for sharing with the special people or person in your life but could be a great family opportunity to share thoughts, ideas, dreams and even more serious thought provoking issues perhaps. it brings out the inner creativity in all of us and is only held back by our own willingness to venture into the unknown world of our individual creativity and imagination. but above all its just plain fun. Have as much fun as you want to, can't wait to see what's next.

Filling out this book has been so much fun, whether it be with my cousin, brother, aunt or friend. Not only does it give the opportunity to collaborate with all these amazing people I get to save all this collaborations in the same spot and revisit them easily. I already have a long list of people I want to collaborate with and I can't wait to bring this book to our next encounter!

This book is such a great idea, be it for friends or couples or even as the book suggests doing pages with a variety of people. I bought it for my hubby & I & it's been entertaining. I also like that you can keep track of when & where you fill out each page.

As a fan of Lisa Currie's "The Scribble Diary," I was excited for her new release. Much in the same fashion, Lisa provides a wide array of prompts for doodling, providing a framework for two people to write, draw, and preserve. The concept of sharing the book is particularly sweet when you consider how much people grow together, even from the time of beginning the book to finishing it. This is an oversized book, larger than I realized, and I was happily surprised, because it feels natural and comfortable to draw in. I'm anxious to dive into my own copy, but I also think I'll be buying more, as it's a perfect engagement gift.

I gave my boyfriend this book for Valentine's Day and he loved it; it was a nice gift idea. The beginning of the book explains different ways that it can be used e.g. with friendships, family relationships, romantic relationships, etc. In my case, it's a great way to collect fun memories and spark interesting conversations. I highly recommend!

This is a very cute work to journal with your child. My little girl and I have fun with her markers and

this book. We filled out some of the pages now and we will fill out later. A great present for a family. Each page has something fun and new that I have not thought of before. A great conversation starter.
