## Customer Reviews

This coloring book brings us actual photographs in the form of gray scale coloring with 50 mesmerizing Cat and Kitten head portraits and full body poses, that will inspire your imagination and kick start your creativity. Grey scale coloring is one of the new and fastest growing coloring styles for adults and advanced colorists. I love coloring gray scale images with colored pencils, the results can be amazing. This is a wonderful book for cat lovers to start their Gray Scale coloring journey, the images in this book were chosen well and do not include multiple very dark areas that are difficult or impossible to color as many other gray scale books do, you will find striped cats, multi colored cats, cats of one color, sleeping cats, and playful kittens.1. This full sized coloring book is filled with 50 gray scaled illustrations printed one per page on medium weight, bright white paper, the back of each page blank.2. This grey scale coloring book is amazing when you use colored pencils, but you

can also complete gray scale pictures with some lighter colored brush tip or fine tip markers that allow some of the details of the image to come through the color. Very dark colors in moderation as they obliterate the image.<sup>3</sup> All the markers that I tested do bleed through the pages but can also be used, I just place a sheet of paper under the page I am coloring to protect the next image.<sup>4</sup> All the images are centered and bordered on each page, and leave a space between the image and the binding, this gives you plenty of space to remove one page from this book or cut the binding off for classes or coloring groups. Just use a large school sized paper cutter or take it to an office supply store.<sup>5</sup>
