Global Warming: The Complete Briefing

Synopsis

How much of global warming is due to human activities? How far will it be possible to adapt to changes of climate? Sir John Houghton's definitive, full colour guide to climate change answers these questions and more by providing the best and latest information available, including the latest IPCC findings. The simple, logical flow of ideas gives an invaluable grounding in the science, as well as the physical and human impacts of climate change for undergraduate students across a wide range of disciplines. Accessible to both scientists and non-scientists, the text avoids mathematical equations and includes more technical material in boxes, while simple figures help students to understand the conclusions the science leads to without being overwhelmed by vast amounts of data. Questions for students to consider and test their understanding are included in each chapter, along with carefully selected further reading to expand their knowledge.

Book Information

Paperback: 396 pages

Publisher: Cambridge University Press; 5 edition (August 10, 2015)

Language: English

ISBN-10: 1107463793

ISBN-13: 978-1107463790

Product Dimensions: 7.4 x 0.7 x 9.7 inches

Shipping Weight: 1.8 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars [See all reviews](#) (1 customer review)

Best Sellers Rank: #118,105 in Books (See Top 100 in Books) #81 in [Books > Science & Math > Earth Sciences > Rivers](#) #107 in [Books > Science & Math > Earth Sciences > Climatology](#) #113 in [Books > Science & Math > Earth Sciences > Weather](#)
