Customer Reviews

Fantastic reference in case of emergency - grab one and add to your hiking pack, your bug-out-bag, or just in the trunk of your car. Easy to read, simple, but extremely useful instructions on basic and intermediate first aid with limited resources.

Got this to take car camping and backpacking. It has some good useful tips and is easy to store in a backpack, but due to its size it's prone to getting bent easily if things move around. So far it's proven to be quite durable though.

Well worth the money. I got a series for my daughter's emergency bag which she carries in her car for trips home from school. The size and durability are added benefits. I personally prefer more pictures and less writing.

Basic information for anyone as a review if already trained in first aid with the added benefit of others on scene could refer to it if not trained. Tough, coated fold out pamphlet. Arrived in perfect condition and delivered promptly.

Great guide and easy to follow

Great guide that you can put in your backpack and reference when you need it. Plastic coated so if it gets wet the water can be wiped off. A Must for hiking, hunting or prepping.

The guide is easy to read and understand. It is waterproof and compact for carrying in a backpack. Great for an emergency first aid guide or for an everyday refresher.

These are nicely put together. The information contained inside is generally pretty basic, but essential. Construction is good and they fit nicely in my kit.
