The thing I really love about this book is how it really starts with learning how to analyze yourself. It is impossible to understand what makes other people tick if you haven't mastered self-analysis and understand what is motivating you. This book explores how body language reveals what people are thinking or feeling. The interesting part is that most people aren't even aware of the signals they are sending. The basic purpose I can see behind the contents of this book is to incorporate some knowledge and some proven facts in this process that can help us make this initial judgment and sizing up as solid as possible. The natural process is based solely on instinct and experience. If a few rules can be added to broaden the spectrum of the initial analysis then in most likelihood we will be able to analyze a person right from the start and mostly be correct about it.

I enjoyed this book. I like thoughts that tackle a standout amongst the most vital things in life, out how to manage others.
